PROFILE

I am a motivated full stack developer. I am currently working on web apps. My expertise includes designing and implementing software applications using a variety of programming languages and technologies. I am seeking a challenging position in a dynamic organization where I can utilize my skills to contribute to the success of the company while continuing to grow and develop my career.

PROJECTS

- I developed and implemented a Library Management System (LMS) to streamline the operations, automating cataloging and circulation processes, and track resources. I designed the system architecture and conducted tests to ensure functionality and performance. The technologies used are Solid.Js Typescript, Prisma, and MySQL. lms.usmanxs.com

- Created a React project utilizing a Crypto API to provide real-time data and information on various cryptocurrencies. Integrated the API into the project to fetch and display live cryptocurrency prices. This is made using react crypto.usmanxs.com

- Developed a student portal using PHP and MySQL for student registration, update, and deletion operations. Implemented CRUD functionality and ensured data security and user-friendly interface.

Tools and Technologies

I am proficient with various tools and technologies .

Front End

- Html
- CSS(Tailwind)
- Javascript
- Typescript
- React.js
- Solid.js
- Next.js

Back End

- SQL (Mysql, Postgrs)
- NoSql (Mongodb, Firebase)
- ExpressJs
- Node.js

Virtualization

- Docker

Programming Languages

- Javascript
- Python
- PHP
